

## **INTERNSHIP at Crown Capital and Arjav Capital**

Arjav Capital and Crown Capital are both stock-market based firms, which research about companies on the stock exchange, and invest in them. Both companies are based in Mumbai, Maharashtra.

### **Agenda:**

I interned at both firms during high-school in order to gain exposure to how the stock market works and on what basis shares of a particular company are bought on the stock exchange. During the internships, I listened to interviews of different firms, researched the prospects of different firms, and learned about different types of orders, etc.

**Interviews/Calls:** I listened to calls of different companies with my mentor regarding their growth prospects, forecasts, and causes of particular results.

**Research:** I researched a range of firms in order to evaluate whether it would be lucrative to invest in the companies. This included reading the annual report, going through the results, and understanding the overall market sentiment of the stock.

**Learned the basics of trading:** This included opening a demat account. Moreover, I also understood the different types of orders possible on the stock market (stop-loss, stop-limit order, etc.).
